

## Safe Table Learning Collaborative: Infectious Disease, Antimicrobial Stewardship, and Other Patient Topics

November 8, 2017

### Speaker Bios

**Dr. John Lynch, MD, MPH**, is an infectious diseases physician at Harborview Medical Center and an associate professor of medicine at the University of Washington. At Harborview, he is the medical director of Infection Prevention & Control, Antimicrobial Stewardship and Employee Health Services. In addition to working at the front lines in each of these areas, John teaches across the state and country and does research in the areas of antimicrobial resistance, antimicrobial use, HCW immunization and HAI prevention in the U.S. and in low-resource settings.

**Cat Mazzawy, RN**, is Senior Director of Integrated Care and Patient Safety at WSHA. Her projects include the Safe Deliveries Roadmap, behavioral health integration, health equity/disparities, Quality Payment Program (MACRA) and ER is for Emergencies in addition to opioid medication management. Prior to starting at WSHA in April, she spent 15 years serving as Patient Safety Officer in hospitals as well as an ambulatory care delivery system. She has a Master of Science in Nursing degree and is a Certified Professional in Patient Safety.

**Sue Bergmann, RN**, is a Quality and Performance Improvement Director for the Patient Safety team at the Washington State Hospital Association. She has eighteen years of experience in healthcare. Sue started the first ten years of her career as an Emergency Department nurse and moved into hospital management, then spent the last eight years of her career working for a physician practice managing operations for their ER and Telemedicine Service lines. Sue has an MBA, and she now concentrates on assisting hospitals with sepsis, readmissions, and venous thromboembolism.

**Tina Seery, RN**, is a Director of Quality and Performance Improvement at Washington State Hospital Association supporting initiatives to reduce pressure injuries, falls and fall-related injuries, and ventilator-associated events. She is a registered nurse with a master's degree in healthcare administration and is a Certified Professional in Healthcare Quality. She has clinical and operational leadership experience in emergency services and quality management experience across multiple service areas.

Hospital Association

**Andrea Manning**, BS, RN, founded Manning Healthcare Group, Inc. and Aurora Leadership Group as an avenue to share her knowledge and passion for nursing, homecare, leadership and success. Andrea is a consultant, speaker and writer on nursing leadership and management, employee engagement, rural healthcare and healthcare innovation, with a focus on home healthcare and hospice. As a nurse leader for over 25 years, she

believes that patient care and outcomes can be improved through strong nursing leadership and best practices.

**Thaddus Wilkerson**, PharmD, BCPS is the Director of Statewide Antimicrobial Stewardship Services for the Alaska Native Tribal Health Consortium. Thaddus served 12 years in the United States Public Health Service as a critical care and infectious diseases clinical pharmacy specialist. He completed his Doctorate in Pharmacy at the University of New Mexico and moved to Alaska in 2007 for residency training at the Alaska Native Medical Center. He has been recognized for establishing the

first Antimicrobial Stewardship Program in Alaska and leading program development for the Indian Health Service. He has a passion for mentorship, collaboration, promoting patient safety and health system efficiency. When Thaddus is not troubleshooting clinical surveillance and data-mining software, you'll find him traveling the state, the country and the world.
