Adult Development Learning Resources

Gathered by Abigail Lynam

"Transformation really means a change in the way you see the world - and a shift in how you see yourself. It is not simply a change in your point of view, but rather a whole different perception of what is possible. It is the capacity to expand your worldview so that you can appreciate different perspectives, so that you can hold multiple perspectives simultaneously. You are not just moving around from one point of view to another, you are really expanding your awareness to encompass more possibilities. Transformation implies a change in the sense of self."

- Frances Vaughn
