**Dr. Nidhi Kohli** is the Royal and Virginia Anderson Professor of Quantitative Methods in Education (QME) in the Department of Educational Psychology at the University of Minnesota Twin Cities, where she serves as the Program Coordinator for the QME program and directs the Longitudinal Methods Development (LMD) Lab. Her research focuses on the development and application of advanced statistical methods for analyzing complex data in education, psychology, and the broader social and behavioral sciences, with a particular focus on longitudinal data analysis. She has over 80 publications with students and colleagues in leading methodological and substantive journals, including *Psychometrika*, *Psychological Methods*, *Multivariate Behavioral Research*, and the *Journal of Educational and Behavioral Statistics*. Dr. Kohli is the outgoing Section Editor for Applications & Case Studies (ACS) at *Psychometrika* and serves on several editorial boards, including *Psychological Methods* and the *Journal of Educational and Behavioral Statistics*. She and her QME colleagues hosted the 2025 IMPS in Minneapolis, Minnesota. Dr. Kohli and her research group have also been active participants in IMPS and other psychometric conferences, and she looks forward to continuing to contribute to the Psychometric Society.
