Gabriel Wallin is an Assistant Professor of Statistics at Lancaster University, UK. Previously, he held postdoctoral positions at Inria in France and at the London School of Economics and Political Science in the UK. He earned his PhD from Umeå University in Sweden. His research lies at the intersection of psychometrics, statistics, and machine learning, focusing on the development of flexible methods for identifying latent structures in social, behavioural, and health data. His work has appeared in journals including *Psychometrika*, the *British Journal of Mathematical and Statistical Psychology*, the *Journal of Educational and Behavioral Statistics, Annals of Applied Statistics*, and the *Journal of the Royal Statistical Society: Series A*.

He currently serves as Co-Editor and Technical Manager of the IMPS Proceedings and as Associate Editor of the *British Journal of Mathematical and Statistical Psychology* and *Teaching Mathematics and its Applications*. In 2025, he received the *Psychometrika* Best Reviewer Award. An active member of the Psychometric Society for over a decade, he also serves on the Awards and Website Committees, following earlier service on the Graduate Student Committee and the Program Committee for IMPS 2024 in Prague.

He is also committed to strengthening the international reach and impact of psychometric research. He collaborates with organisations such as the British Red Cross and Save the Children, advises the Swedish National Agency for Education, and has delivered workshops for organisations including the Ministry of Education in Peru. His research has been supported by the Swedish Research Council, the Japan Society for the Promotion of Science, and Duolingo.
